

Cooling Fan Assemblies

Leading the Market with Coverage and Quality!

Four Seasons cooling fan assembly line now encompasses more than 300 SKU's covering the most popular vehicles in the market. In fact, we offer the most comprehensive coverage of any manufacturer on late model import and domestic applications. Our leadership role continues to grow in 2009 with the addition of 56 new assemblies.

This line consists of both cooling fan and condenser fan assemblies. All of our assemblies are designed for quiet operation and dependable performance. These units are drop in replacements that save time and money by providing the option of replacing the whole assembly rather than buying the pieces individually. In addition our assemblies are guaranteed to meet or exceed the fit, form and function of the original unit.

Your Automotive PARTner. At Four Seasons this is more than just a tag line. It's how we do business. We are constantly searching for ways to help our customers maintain their competitive edge; from the newest technology to the latest application components. Your Automotive PARTner, it's who we are.
